

Introducing the 2017 **GPS-BIOMED Peer-led Seminar Series!**

We've been busy this year organizing career & networking nights, sci comm programs and alumni mentorship. Now that summer is here we're excited to bring back our peer-mentoring initiative! This year, the format and topics are a bit different. Instead of focusing on specific career tracks we'll dive into the following:

- Discussing career plans with your PI, *June 15th, Natural Sciences 2-1201*
- Enhancing your professional presence, *July 13th, Natural Sciences 1-1114*
- Balancing research-career prep-life, *August 17th, Natural Sciences 1-1114*

We will have three interactive seminars covering the topics above. Each seminar will begin with a panel discussion featuring your fellow graduate and postdoctoral peers. Following the panel Q & A, we'll have breakout discussion groups where attendees can openly discuss strategies and approaches. We're recruiting panelists! Please contact Emma Flores, eflores@uci.edu, if you are interested in sharing your experiences with others.

Mission

Create & cultivate an open, honest and supportive environment that empowers grad students and postdocs to have meaningful discussions about career development and advance their career plans.
